Wondershare SOFTWARE Wondershare 2012 WinSuite Winsuite Erroneous screen For this reasons Wondershare WinSuite 2012 needs a patch which can be found here. The following answer is as follows: You have to download the patch. When you have downloaded the patch you have to use the win32 Iso to extract the patch to you file system. Then you have to execute the new win32.exe and browse to the correct folder. Unpack the patch and update a file called updater.reg in the installation directory. Re boot your machine and you should be good to go. The patch is not available with the actual software. 1 The fix which I described earlier can be found here The following answer is as follows: Wondershare WinSuite 2012, the software has a bug where the full version is not always available as no updates are allowed once the version is active. It appears this happened to you. The link mentioned by another answer works but, I always get the error code 0x80073712 when trying to access the link. However, you can find the full version free online, all you have to do is click on the download link for the full version which will prompt you to download the patch. Open the patch and follow the steps of the patch. After that you can find the full version online. Q. I downloaded Wondershare WinSuite 2012, and I am attempting to install it on a Vista 64-bit Vista Business box. The only error it returns is Error 0x80042ACD during the installation. This is a new box purchased this week. A. WSA had this same problem but I have not found a solution to it. You must remove WinStuff 2.x which is interfering. the only thing to do is to remove it, then reinstall WinSuite 2012. You can view WinStuff 2.x by going to Start > All Programs and look for WinStuff 2.x. Click on this if you see it. At the top right end of the screen is a button that looks like a stop sign. Click on that. Then there will be a
